**The power of retrosynthetic analysis becomes evident in the design of a synthesis. The goal of retrosynthetic analysis is structural simplification. Often, a synthesis will have more than one possible synthetic route. Retrosynthesis is well suited for discovering different synthetic routes and comparing them in a logical and straightforward fashion. A database may be consulted at each stage of ...**

**Synthesis courses strive to expand students' ability to master new content, think critically, and develop life-long learning skills across the disciplines. While it is not feasible to design courses that cover "all" areas of general education, synthesis courses should function as a careful alignment of disciplinary goals with a range of Mason Core learning outcomes.**

**MOF-5 was prepared using a room temperature synthesis, wherein separate N,N-dimethylformamide (DMF) solutions of terephthalic acid with triethylamine and zinc acetate dihydrate were prepared, then the zinc salt solution was added to the organic solution with rapid stirring at ambient temperature. A white precipitate was observed almost immediately and the reaction was allowed to proceed for 2.5 h.**
